

LEGACY AUDITS: IMPROVE YOUR OUTDATED SOFTWARE SYSTEMS

QUANTUM

QNUMES

WHAT IS LEGACY SOFTWARE AUDIT?

A legacy systems audit is a comprehensive evaluation of outdated systems, processes, or data within an organization.

It helps identify potential risks, inefficiencies, and opportunities for modernization to improve overall business operations and security.

THE BENEFITS OF LEGACY AUDITS

Improved Efficiency and Productivity

By identifying outdated processes and inefficiencies, legacy audits can help organizations streamline operations and increase productivity.

THE BENEFITS OF LEGACY AUDITS

Enhanced Security:

Legacy systems are often more vulnerable to security threats.

A legacy audit can identify potential vulnerabilities and help organizations implement measures to protect their data.

THE BENEFITS OF LEGACY AUDITS

Enhanced Customer Experience:

Outdated systems can negatively impact the customer experience.

By modernizing legacy systems, businesses can improve their ability to serve customers effectively.

THE BENEFITS OF LEGACY AUDITS

Cost Savings:

Legacy systems can be expensive to maintain.

A legacy audit can help organizations identify areas where costs can be reduced, such as by consolidating systems or migrating to the cloud.

THE BENEFITS OF LEGACY AUDITS

Risk Mitigation:

Legacy audits can help businesses identify and mitigate potential risks associated with their legacy systems, such as data breaches or system failures.

KEY CONSIDERATIONS FOR LEGACY SYSTEM UPDATES

Choosing the Right Vendor:

It is crucial to select a vendor with the expertise and experience to handle your specific legacy system update.

KEY CONSIDERATIONS FOR LEGACY SYSTEM UPDATES

Data Migration Strategies:

A robust data migration plan is essential to ensure your data is transferred safely and accurately.

KEY CONSIDERATIONS FOR LEGACY SYSTEM UPDATES

Integration with Existing Systems:

Ensure the new system can integrate seamlessly with your IT infrastructure.

KEY CONSIDERATIONS FOR LEGACY SYSTEM UPDATES

Change Management Planning:

Develop a comprehensive change management plan to prepare your employees and stakeholders for the transition to a new system.
